

eSTOP™

PORTABLE TRAFFIC SIGNALS

saving lives | reducing injuries | increasing productivity

APPROVED

NOW AVAILABLE!

PRODUCT DESCRIPTION

The eSTOP™ has undergone extensive testing and development and is designed to remove traffic controllers away from the hazard zone. Not to replace traditional auto traffic lights these are still controlled manually by an operator.

Independent trial confirmed a 93% reduction of near misses when using the eSTOP™.

- Safe operation distance of up to 400m (option to increase)
- Single user operation
- Easy implementation and integration
- Small, lightweight, water and dust resistant hand held remote controller (IP65 rated)
- Portable and easy to assemble design, carry case included.
- Hand held remote controller mimics traffic lantern status in real time
- 12 month warranty

FAIL SAFE FEATURES

- Ensures no two green lights can be displayed at the same time
- Low battery warning
- Tilt alarm
- Lantern fault warning
- ArrowES full data encryption

COMPLIES WITH

- NZ Transport Agency - CoPTTM
- ISO 9001

FEEDBACK FROM TRAFFIC CONTROLLERS

"The eSTOP™ can be seen from a long distance by an approaching motorist...great visibility"

"We've not had to jump out of the way, motorists don't miss the eSTOP™"

"When it's foggy or standing in the shade, motorists can't see us. They don't miss the eSTOP™"

"No more abuse from motorists when the eSTOP™ is used"
